

❄️ **THINKING ABOUT INVESTING IN A NEW REEFER TRUCK ?**

cargotuff:
by Sai Raj[®]

TR THERMO KING

Factors to consider when making this long-term investment

- ❄️ Suitable body design and dimension based on your product accommodation as well vehicle stability.
- ❄️ The appropriate vehicle chassis selection depending on your cargo weight and volume requirement.
- ❄️ The right type of floor design based on your goods and operations.
- ❄️ Door configuration, whether you need just rear doors or side doors can prove useful.
- ❄️ Well-designed insulation thickness and materials to keep your operational costs to a minimum and your product movement safe.
- ❄️ The appropriate reefer unit selection based on your product, operations and loading / unloading practices.
- ❄️ Optional accessories such as multi temp arrangements, load securing telematics systems, etc.
