FIBREGLASS AND STEEL
TRUCK & PICK UP BODIES

www.sairaj.com

cargotuff by Sai Raj

Under our Cargotuff brand, Sai Raj designs and manufactures a full range of insulated and dry-freight bodies for trucks and pick-ups, built in fibreglass and steel. Our offering extends to motorcycle carrier boxes, trailers, and bespoke special-purpose bodies and conversions tailored to each client's needs.

Trusted by East Africa's leading businesses, transporters, and long-distance hauliers, our bodies safely and hygienically transport everything from frozen ice cream to day-old chicks, from meat to bread, and from flowers to dairy produce — and much more besides.

WE MANUFACTURE QUALITY PRODUCTS SUCH AS:

- FIBREGLASS & STEEL TRUCK BODIES
- PICKUP BODIES & CANOPIES
- VEHICLE CONVERSIONS AND SPECIALTY VEHICLES
- INSULATED TRUCK AND PICK-UP BODIES WITH THERMOKING UNITS

SINGLE SKIN
BODY CONVERSIONS

cargotuff by Sai Raj

When functionality and affordability matter, our Cargotuff single skin truck body conversions offer the perfect solution.

Designed with a robust yet lightweight structure, these bodies are ideal for general transport and commercial use where insulation is not a primary requirement.

At Sai Raj, we engineer each conversion to meet the highest standards of strength, weather resistance, and longevity. Whether you're transporting goods across town or operating in rugged conditions, our single skin bodies provide the reliable performance your business depends on — all while keeping operating costs low

WHY SINGLE SKIN?

1. Built for Strength and Durability
2. Custom Body Conversions Available
3. Lightweight Yet Highly Robust
4. Maximizes Cargo Carrying Capacity
5. Secure and Reliable for Transport
6. Designed for Efficient Business Operations

RIGICORE

BODY CONVERSIONS FOR DEMANDING APPLICATIONS

When your business demands durability, thermal efficiency, and structural integrity, Cargotuff Rigicore truck body conversions deliver. Built using advanced rigid core panel technology, these bodies offer superior insulation, enhanced impact resistance, and a sleek finish — making them ideal for refrigerated transport, pharmaceuticals, dry freight, and other temperature-sensitive or high-value cargo.

At Sai Raj, we custom-design each Rigicore body to match your exact operational needs. Our lightweight yet robust construction improves fuel efficiency without compromising on strength, helping you move more, waste less, and drive smarter.

ADVANTAGES

1. Advanced Rigid Body Construction
2. Enhanced Strength & Durability
3. Excellent Thermal Insulation
4. Ideal for Refrigerated Transport
5. Protects Temperature-Sensitive Cargo
6. Custom-Built for Your Business Needs

INSULATED FIBREGLASS
BODY CONVERSIONS FOR TEMPERATURE -SENSITIVE CARGO

In today's fast-moving supply chains, maintaining product integrity is critical — especially when transporting perishable or temperature-sensitive goods. Our Cargotuff insulated truck body conversions are designed to deliver outstanding thermal performance, keeping your cargo fresh, safe, and compliant from pickup to delivery.

At Sai Raj, we use high-density insulation materials and precision-engineered construction to ensure consistent internal temperatures, reduce thermal loss, and improve energy efficiency. Whether you're in food distribution, pharmaceuticals, or cold chain logistics, our solutions are built to meet your industry's strict standards.

WHY INSULATED FIBREGLASS

1. Superior Thermal Insulation
2. Maintains Consistent Temperatures
3. Reduces Thermal Loss
4. Protects Perishable Cargo
5. Improves Energy Efficiency
6. Built for Reliable Cold-Chain Delivery

FERROTUFF

BODY CONVERSIONS FOR HEAVY-DUTY DEMANDS

When strength and durability are non-negotiable, Cargotuff Ferrotuff truck body conversions stand out as the ultimate solution. Designed for rugged performance and built with reinforced materials, these bodies are ideal for industries that require dependable transport in the most demanding conditions — from construction and mining to waste management and industrial logistics.

At Sai Raj, our Cargotuff Ferrotuff conversions combine heavy-duty steel frameworks with high-impact resistant panels to deliver unmatched structural integrity and longevity. Whether you're hauling machinery, tools, or bulky cargo, Ferrotuff bodies are built to take the load.

WHY FEROTUFF

1. Heavy-Duty Steel Framework
2. Exceptional Strength & Durability
3. Built for Rugged Operations
4. High Load-Carrying Capacity
5. Ideal for Industrial Applications
6. Reliable for Demanding Logistics

REFRIGERATED
BODY CONVERSIONS FOR COLD CHAIN EXCELLENCE

When maintaining temperature control is mission-critical, our Cargotuff refrigerated truck body conversions provide the reliability and performance your business demands. Designed for sectors like food distribution, pharmaceuticals, floriculture, and medical supply transport, these conversions ensure your cargo stays fresh, safe, and compliant — from loading bay to final destination.

At Sai Raj, we build refrigerated bodies with high-performance insulation, advanced cooling systems, and durable finishes tailored to your operational needs. Whether you're transporting frozen, chilled, or temperature-sensitive goods, our custom solutions offer consistent temperature retention, fuel efficiency, and hygienic design.

ADVANTAGES

1. Precise Temperature Control
2. Reliable Cold-Chain Performance
3. Keeps Cargo Fresh & Safe
4. Advanced Cooling Systems
5. Fuel-Efficient Operation
6. Ideal for Perishable Goods

BOTTLE CARRIER

BODY CONVERSIONS FOR SAFE, EFFICIENT DELIVERY

Designed specifically for the beverage and bottling industry, our Cargotuff bottle carrier truck body conversions combine strength, accessibility, and safety to streamline your delivery operations. With reinforced frames, modular shelving, and easy-access compartments, these bodies are engineered to handle the weight and volume of bottled goods — while minimizing loading time and breakage.

At Sai Raj, we customize each bottle carrier body to match your route requirements and cargo volumes. Whether you're distributing soft drinks, water, or glass-bottled products, our conversions offer the durability and organization you need for faster, safer deliveries.

ADVANTAGES

1. Reinforced Heavy-Duty Frame
2. High Load-Carrying Capacity
3. Enhanced Safety & Stability
4. Easy Loading & Unloading
5. Minimizes Bottle Damage
6. Ideal for High-Volume Deliveries

MULTIPLE DOOR

BODY CONVERSIONS FOR FLEXIBLE, EFFICIENT LOADING

When speed, convenience, and organized access matter, our Cargotuff multiple door truck body conversions deliver. Designed for industries that require frequent stops and compartmentalized deliveries — such as logistics, retail distribution, parcel delivery, and beverages — these bodies improve workflow, reduce handling time, and enhance security.

At Sai Raj, we build each unit with strategically placed side and rear doors, customized compartments, and durable materials to suit your route and cargo needs. Whether you're delivering varied goods or working on tight urban schedules, our multiple door configurations provide the versatility your operations demand.

ADVANTAGES

1. Multiple Access Points
2. Faster Loading & Unloading
3. Flexible Delivery Operations
4. Improved Workflow Efficiency
5. Enhanced Cargo Security
6. Ideal for Multi-Stop Deliveries

TANKER & BOWSER

BODY CONVERSIONS FOR RELIABLE MOBILE DISPENSING

Whether you're supplying fuel, water, or other liquids in remote areas or job sites, our Cargotuff tanker/ bowser truck body conversions are designed to deliver safe, efficient, and dependable mobile dispensing solutions. Built with high-quality tanks, robust pumping systems, and compliant safety features, our tankers/ bowsers are ideal for construction, agriculture, mining, disaster response, and fleet support operations.

At Sai Raj, we engineer each tanker/ bowser conversion to meet your specific capacity and functionality needs — from fuel dispensing units with calibrated meters to water bowsers for dust suppression or potable supply. Durable, easy to operate, and compliant with industry standards, our solutions keep your operations moving without interruption.

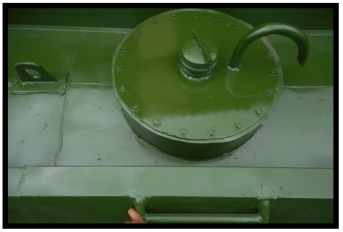

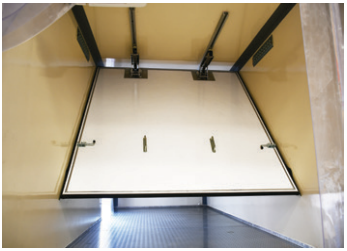

ADVANTAGES

1. Reliable Mobile Water Supply
2. Calibrated Metering Systems
3. Safe & Efficient Dispensing
4. High-Capacity Tank Options
5. Robust Pumping Performance
6. Built for Remote Operations
